PSYCHO KILLER

The Psycho Killer is a psychotic spin off from the ever popular Quiver Killer. Featuring all the design aspects that made the Quiver Killer one of the most popular surfboards in the world for the last few years, it's easy to catch waves and create speed. It loves tubes, and flat faces, and is fully capable of performing full rail curves and nimble maneuvers when asked. This sort of wide ranging function is what makes the "Killer" Series a favorite for surfers from our top team to everyday Janes and Joes.

- Revamped outline, featuring a refined nose curve and double bump Swallow Tail, for more "Pop" in small surf, while retaining hold in solid waves.
- New "Hidden Volume", two stage deck line. Packs in the foam for paddling, drive and stability, but keeps the rails sensitive and agile for precise rail based surfing.
- Comes standard with deep double concave through the tail rocker, or can be really souped-up with R-4 Channels out the tail.

UBER DRIVER

Pro-formance series

“Uber” means excessive, beyond, and above all. The new Uber Driver is just that. Excessive fun, beyond expectations and above all - a great everyday surfboard. It’s designed to further blend the barriers between hybrids and Pro-Formance surfboards.

The Uber Driver features the outline and rocker/concaves from the back half (engine room/control center) of the DRIVERS currently ridden in smaller waves on tour by Kolohe Andino and Griffin Colapinto. It is then blended to a lower, wider, faster, more forgiving and playful nose. The tail features a low centerline rocker with a curvy rail line rocker under the rear foot, that transitions from a generous single/double concave through the front fins, to a noticeable vee behind the rear fin and out the tail. The nose rocker and forward outline was imported from our Rocket series outlines, and allows this board to be ridden shorter, with more speed out the gate and more drive and stability for everyday surfers. The outline and rocker are blended in a way that enables the board to still be surfed like a modern Pro-formance shortboard. It just feels like you’e cheating a little. The Uber-Driver is the Ripper’s Pro-formance hybrid. Uber-ripping fun for everyone.

AVAILABLE IN

The Puddle Jumper HP is a souped up, slimmed down, refined Puddle Jumper. It features a pulled in nose with the wide point brought back, and a narrower, pulled in tail block. The new outline enables the PJHP to surf even more like a normal board- a very playful board that's easy to paddle and ride yet still allows more radical and quick turns than all the other PJ models. It's easy on the eyes, sleek and refined under the arm, and its smooth foiled lines deceptively hide its significant volume - with built-in speed to spare. Stand on the tail of this thing and simply go to town, up and down, round and round, like you have a motor in small surf. The tail, with its foiled rails and deep vee, holds in and give confidence at high speeds. The overall flat rocker, generous width, and deep central concave generate small wave squirt like you would expect from a Puddle jumper.

The Puddle Jumper HP can take the domesticated gentleman into a realm thought long gone. Speed, with quickness, fast but loose, precise but playful. If you are one of the thousands of surfers who have enjoyed one of the Puddle Jumper series, the PJHP allows you to take your small wave surfing to the next level.
